Rehabilitation at
Milan General
Hospital

"I chose to have my hip rehabilitation at Milan General Hospital. The doctor on staff checked my medical charts, vital signs, and progress. The convenience of being close to home, plus convenient parking and access, made it easy for visitors to come see me.

A physical therapist came to my private room for much of the therapy. They had me walking in no time. I don't walk with a walker or cane, and I don't have a limp. The meals were great and the room was nice. Nurses and staff helped with my medications and all my daily needs."
